PROFESSIONAL SUMMARY

Mobile and Web Application Developer with over 3 years of experience building production-grade applications across Flutter, Angular, and modern web stacks. Proven track record delivering full-stack solutions integrated with Odoo ERP, Firebase, and REST APIs. Skilled in translating business requirements into scalable, user-focused products, with additional strengths in data analysis and BI reporting using Python, SQL, and Power BI.

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, Firebase (FCM, Firestore, Auth), REST API Integration
Web Development	Angular, JavaScript, HTML, CSS, WordPress, Responsive Design
Backend & ERP	Odoo ERP Customization & Integration, REST APIs, Python
Databases	SQL, PostgreSQL
Data & BI	Power BI, Excel, Data Analysis & Visualization, OpenCV
Tools	Git, Figma, Postman, OpenProject
Languages	Arabic (Native), English (Professional Working Proficiency)

PROFESSIONAL EXPERIENCE

Mobile Application Developer — BEEAH Planners, Architects, and Engineers

Riyadh, Saudi Arabia | August 2023 – Present

- Designed and built the company employee mobile application from the ground up using Flutter, delivering features for leave requests, performance evaluations, contract management, and field site visit reporting.
- Integrated the mobile application end-to-end with the Odoo ERP system through custom REST APIs, enabling seamless data flow between the app and core HR, project, and operations modules.
- Implemented Firebase Cloud Messaging with deep linking to route push notifications directly to the relevant in-app screens, improving user engagement and response time.
- Developed responsive web applications using Angular, focused on clean UX and performance.
- Designed and launched multiple websites and internal portals, improving user engagement and ease of access for employees.
- Built dynamic Power BI dashboards and interactive reports, giving leadership real-time visibility into operations and accelerating decision-making.
- Developed a traffic analysis solution using OpenCV and Python for an urban planning project, improving accuracy of traffic flow data used in infrastructure planning.
- Customized and maintained Odoo ERP modules to match internal business workflows, reducing manual effort and operational inefficiencies.
- Managed project timelines, tasks, and team collaboration through OpenProject, ensuring on-time delivery across multiple parallel initiatives.

EDUCATION

Bachelor's Degree in Web Development

Arab Open University | August 2023 – Present

Diploma in Programming Techniques and Web Development

College of Telecommunications and Information | Graduated July 2023

SELECTED PROJECTS

BEEAH Employee Mobile Application

Flutter, Dart, Firebase, Odoo ERP, REST APIs

- End-to-end employee experience platform covering authentication, dashboards, leave requests, performance evaluation, contract management, and field site visit reporting.
- Deployed to both Android and iOS with full Arabic RTL support and bilingual UI.

Traffic Analysis System

Python, OpenCV

- Computer vision-based traffic monitoring solution that processes video feeds to extract traffic flow metrics, supporting urban planning and infrastructure decisions.

Internal Web Portals & Dashboards

Angular, JavaScript, HTML/CSS, Power BI

- Designed and developed internal web tools and reporting dashboards used by management and operations teams to monitor KPIs and project progress in real time.
